Medi Care Forum

Built a forum application using html,css, javascript and bootstrap for frontend and php for backend. In this form there are different categories of health issues where the user can ask the question related to particular category and can also see and post comments on the asked questions.

✓ **GitHub Link:** <https://github.com/Kajal-Soni-123/forum-application>

ChitChat

Built a chat application using html,css, javascript and bootstrap for frontend and php for backend. In this chat application one user can communicate with other user in the similar way as we do in other chat applications.
